# Atharv Pise

atharv.spise@gmail.com | +91 7709272986 | Nagpur, Maharashtra, India | www.linkedin.com/in/atharv-pise-8128a6271

## EDUCATION

**B.Tech in Electronics and Telecommunication Engineering** **Feb 2021 – Jun 2024**
*S.B Jain Institute of Technology Management and Research*
*Nagpur.*
With a CGPA of 8.34

**Diploma** **2018 – 2021**
Government Polytechnic Nagpur
With a score of 81.85 %

**SSC** **2017 – 2018**
*Saraswat Public School, Saoner*
With a score of 76.40 %

## Skills

**Tools –** HPC, Warewulf, Slurm, xCAT, PXE, InfiniBand Configuration and Management.

**Hardware & Infrastructure –** Server Hardware, Rack & Stack, Node Installation, Hardware Troubleshooting.

**Technical Skills –** Linux OS, Networking, System Security, Basic of Cloud & DevOps.

**Additional Skills –** DNS, DHCP, LDAP, TCP/IP, Firewall, Bash Scripting, Wireshark, Git, Docker.

## PROJECTS

**"Deploying High Performance Computing Cluster on Container"** **Jan 2025**

This project is about deployment of HPC on Containers using Warewulf. For monitoring we are using Ganglia. SLURM has been used to manage Resources and accounting.

**Tools & Technologies Used:**

- **Warewulf:** Lightweight container-based cluster provisioning tool used to automate node deployment and management.
- **SLURM (Simple Linux Utility for Resource Management):** Open-source workload manager used for resource allocation, job scheduling, and accounting.
- **Ganglia:** Scalable distributed monitoring system for HPC environments, used to collect and display cluster health and performance metrics.
- **Linux (Rocky/CentOS):** Base OS for all nodes with shell scripting for automation.

## Courses

**High Performance Computing System Administration** **Aug 2024 – Feb 2025**
C-DAC Acts Pune.

## EXPERIENCE

**Technical Support Engineer** **September 2025**
*Netweb Technology India Limited*

**Roles & Responsibilities:**

- Worked on both hardware and software aspects of HPC systems.
- Performed installation of hardware components such as motherboard, CPU, RAM, and other peripherals.
- Involved in racking, stacking, and mounting of servers, workstations, and storage systems.
- Conducted operating system installations, RAID configuration, and disk partitioning during system setup.
- Performed firmware and BIOS upgrades for system optimization and compatibility.
- Involved in Slurm configuration for workload management and network configuration for node connectivity and communication.
